

USDA Summer Internship

Get PAID doing sunflower research this summer!

Summer 2017 - Full Time

- Gain experience working with an interdisciplinary group
- Further your knowledge in the fields of genetics, plant pathology, entomology, and general agriculture
- Design and implement your own, unique research project
- Assist with small plot research through the following tasks:
 - Planting yield trial and nursery sites
 - Evaluating plant varieties with field notes
 - Crossing and selecting lines to make new varieties
 - Other general field and lab work
- Enjoy working with an open-minded, fun, and focused group!

Please send your resume if interested.
Feel free to text or call with any questions!
